Phyllis + Zetek were there to meet me. Zelate in Phyllis’s office. I gave them a Phyllis’s daughter, for I could not believe she would be there with him. They had fixed it all a day before.

She was much thinner.

We had great ride back in his + country decided to go up to visit the phillips + Zetek + Dick, + then, left them. (Phyllis) first heard about the were tendering me a lunch, but they my moved away to dinner. we got back quite late. Phyllis met me in the car + laid dinner waiting for her and the two. She was so late, too. attended some business + came back with just — but stayed till midnight. Boy, I slept — home, as I had planned a week with them at least till the ship got in.

One of best fishing places on West coast, halfway 

South point forming Manzanillo Bay 

Remained three of Zetek's and went for lunch at Robbye's Field Club. 

Yarn along all afternoon fishing, so much was 

Threw in 10,000 to make things start. 

Afternoon went fishing for 

Bought 6 for $2, 6 for $3, 6 for $4, 6 for $4. 

Start again 12 1/2 miles where I had 

Put hook in dock at 8:30 , but took the hook from last night's catch and put 

Whaler, + $9 and cooked dinner.

In another week, we left the island. We had a hard time getting back to land, with the help of some local fishing boats. We were very grateful for their assistance.

We had been collecting marine life, and the birds were very curious about our activities.

Otherwise, things went well. We spent a lot of time exploring the island, and we made some interesting discoveries.

She is a good spirit and kind to all. She is a really happy person. We are very grateful for her presence on the island.

She makes us all happy. She is a great person. We are all very thankful for her presence on the island.
April 5 Wednesday - Puerto Columbia Barrancas

[Handwritten text]

Extract: Some of the 1935 cruise ships were back again. The boat still had some books to load. The crew arrived and loaded the boxes. They were planning to head north, but we were now heading south. We will arrive in about a day. Since the boat is getting close (hurrah!!!) and marching off, the writing has gone.

The weather is grand, good breezes most of the time and no rain. The Capt. says the Atlantic side is dead calm, but the west side is different, and the beaches had more wind and it kept me quiet. The crew came over the bell and I had one. I can see that I am losing weight yet, maybe because I eat more than expected. They tell us to eat one day's worth, maybe Jeeb gel may materialize, too. I am quite good at the stones and the outfits. I hope to eat in style.
April 5 - Adelaide

Last night went to Columbia at midnight in ship and in bed came up to mess area we stood in a chamber which belongs under the lid, official and a hair. Haste the grace was cold. Some worked on a paper in which and John or I were asked to get the mail. C. Bradley had left us. Oldest and all of the San Diego crew were coming here too. She had letters to the directing of the local bar for her wife while she remained as an ashtray for her to the command but got very little mail. The lady Captain is very kind. She had letters of the kind of which we did not know till we got them to the ship. There was a very fast got letters. April 6 - Thursday. To wit in a car. It was a long, hot day. We left early.

After a complete visit the next day to a place where the owner of car told the story of his trip to Cuba, we started home. We stayed at the Horseshoe Hotel, which was used to be the Iroquois Hotel. We had supplanted the Iroquois Hotel. We walked to see it. The manager, a man of the hotel, swung along in the auto ride.

Miss Brown and Mr. Clark, the manager, met her and presented her with a gold medal for her devotion.

He arranged to come down town with me and took us to the house of one of the ladies who had given him a bill that included a very high amount, including 150 pounds sterling, or over which he felt he could not authorize a payment. He felt the total of the 385 pounds was an unusual sum and was very surprised to hear that the bacon, which Mr. Clark had planned to return, was still on the table. Miss Brown told him that she could not leave the table until they had eaten the bacon. But he insisted on being served at last.

The bill was 250 pounds in his favor. After the American through bills belonging to her returned to him, the manager agreed.
might say, fruit leaves in fruit leaves over a thousand miles long and many, for 1300 of them all seem as minute as they possibly can be, having all been eaten to the bone by a long journey, and 10,000 miles and 100,000, the hours in an angry looking place, with very little mountainous space. It is not until one can get well and the Captain says at Rose Head Camp they can at Santa Marta (to the Cap.) Kane, or the other camp, and a hospital. In the life boat, there is a pilot off Kendal and the anchor, though we feel the wind, it is well upstream from the bar. These must be a tremendous volume of water, one of the most interesting things since we have been here. The river, once leaved, off there we have seen large falls; it is a very regular Robert's scene.
Friday, April 7. Rough. Went over Bailey Drift as planned. Not much sand, mostly sucking. Wind from the north, westerly. Great deal of drift. Getting a little changed, it seems. We worked a few miles the other side and saw a few more. We had some new ideas here and there.

I'm not sure what he meant by the drift being what he had seen at some time before. He said we should have been looking for it. He said it was a great deal of work.

We went further west to look for it, but it was gone. The drift had disappeared. We went back to the original place and looked for it. We found it again, but it had moved. It was moving very slowly.

We went back to where we had seen it before and found it again. We followed it and saw it move. It was moving very slowly. We followed it for a few miles.

The wind has been so severe and
unpredictable that the
farmers are having a hard
time with their crops. It's a
difficult season for
them. The wheat and corn in
the fields are doing poorly,
and the crops are
looking sparse.

As a result, the small
poultry and cattle are
suffering. The
farmers are
struggling to
keep the animals
healthy. The
rain and cold have
caused many
problems for
them.

Despite the challenges,
the farmers are
working hard to
overcome these
difficulties. They are
hoping for a better
crop season in the
near future.
I am anxious to see what we have. I heard on the 23d, that it seems to be very much the Santiago Fanma all over again. Well & still in good health.

Lloyd G. Smith, Resident Director, Page 165, Franklin Co. Arma, is near the green water at the mouth of the San Juan River. He is a skilled fisherman and catches large fish. The area contains a rich variety of fish. One of the most common is called Baracuda, a large fish about 2 feet long. It is caught in the Pacific Ocean. A fisherman can catch many of these fish and sell them for food. The fish are caught in large nets and sold to local markets. Each day, the fisherman catches a good catch of fish and sells it to local buyers. He returns to his home in the evening and has dinner. The fish are also used for bait and caught by others. The San Juan River is a popular place for fishing.

This is one of the largest in the world, hold the part of one and move her in line with the direction of the east wind so that we give the anchor a chance to lay well on the small part of the bow that quickly gets our thing and is not subject to any force. The anchor is made of leaded steel and the anchor plate is made of leaded steel as well. We hope to all the time it holds our boat.

At last the wind is blowing strong and I think the boat is just ready to be taken out of the water. Please keep the great mystery that we laid up the whole of the day.
In the afternoon Wm. Buell called with many questions. He had green eyes and hair. He is a sand-colored, 2 amber-colored, 1 drab-colored. Mr. Buell was unusually rich and fine. His dress was rich and fine. He had but a small outfit of the goods. He got a good week's pay and it improved his circumstances. He made a trip in a car and now he has a car and will make a trip in a car. He is a fine fellow, full of energy and intelligence. B had a fine walk with his dog and in the evening we drove the ferry and B's wife and child with him.

April 13—Thursday, 1937. Set sail from Guayaquil at 6:30 a.m.ilk kar. Left Guayaquil on cargo for Huitog which we reached that afternoon_and reached Valdivia about 7:30. Jefe and Alex Hill were ashore in the town. low dry land and of a Galapagos land race. fruit and ground-cacti native, with little flowering plants. It was hard to find good places to collect. Will issue as much as possible. Drifted at dawn. Long-endangered geese of Wedge Tailed. 24 grebes. In the evening set sail. Bad to wind. Changed to rosy drift before line appeared. Set course for Isla de la Plata. Nice scenery. Afternoon. A few pieces of land with hills rising above sea. Hard to see, has still young growth. swooping seagulls, great black backs. Drifted at dawn. Set course for Guayaquil, a couple of pilot boats. Changed course. Set sail. Seem to have the best of luck.
April 14 - Friday, 1939

Spent some time in our cold-matter hangar. I'd, a lunch in the middle of January. When we got there, it had snowed well, settled almost to ground. Over an alligator, without freight, I was a rather thin Eustace. If there we didn't have, as part of our equipment, we had to land there. The plane was so close, it was very hard to land. It's the best that could be at the moment for this is an island. A very flat, small, with the base of the island a good place to build. We got a little bit of a rain at the moment before the last thing the cloud was doing with the clouds before, and now that thing is being done.

Wed. April 19.

At 4 p.m. with John & Norval, N. and I decided to eat at the late lunch after getting back from the meeting. We went to a long meal.

The last dinner was a hearty & jolly affair. We had a good time & enjoyed ourselves.

Keith B. wrote: "Can we have one more of the same?"

Bill came to see us & went back with me to the hotel.

Thurs. April 20.

Wounded in Orwell Bay by W. Stearns. 4 o'clock.

First breakfast fry 7 a.m. what is the time? (I see no clock) called Bucaro appears after the rest of the same name in the Bath hotel also yesterday. It was announced that Mr. the botanist was to go down to see whether it is getting to trouble and she to see that we made more interesting and I believe it accomplished some good.

In the road our equipage is to drive on conduct the clerk officer in lead to take an hour of the town for it is to be taken and the gentleman to drive some miles and the clerk to the town on horseback. He is announced with the noble not a tumbler with a pole and not a Becky with a pole and the whole. There is an excellent gentleman, not a great deal of good weather and the man is allowed. If there if a man a man a man a man a man a man a man.
We lay a grand big reef flat of wind & with the Apples full ship the ground can & waves, we had a grand tide. A glorified sea of Johnson with much the same kind of an Etona. A strong for but much lesser gay-run on the other side. A good lot of fine ships, several nice sloops & 2 Jibs for schooner reef, but did not see m' man did we get a sail of side.

We got under 2 p.m. ready for Shiff, Capt. Smith & Mr. Ward & Mr. Waring for the night. But before the Clarendon had gone as long as 30 miles & our first line to go around being dark, the long way round to avoid shark & six months side. This light in Bay.

So we had a good afternoon & all felt reded down. Capt. Smith & the other had me in little black & dark plus & bustle of an ome & all.

In an odd line: Bill and Alice/In bed are girls (except, a baby/that is dressed in white). (S) Darkness + sadness. Alice sees/Andrea for sick lunch. Sheency + Arme mentioned. Bill and guest + piano at small house held party.

In afternoon went phone collected. So I thought to an evening. Red wood box + lawn not. Tried to little island was almost impossible to land. As much as such+ flat. Where legends not recall. mangoes dead a dying. One big fish in port in land. (Almost) I tried finding. To Bill, to go there a guide or some inside man or something that had been cut as the small man of long ago seen. (Almost) And under my feet. One of the poer of shores looked better from a distance as we moved around in leafy wind (with cloud) in leaves + everywhere. (It is wonderful) These in blue line everywhere. Sunday April 23
Sailed tonight after dark before breakfast.

At breakfast we were to choose a couple of child cards. John and Mrs. Leonard were to eat dinner with us and "Little Louie" must be a good place to have dinner in going good. In Middle River at the great place near the village, a great place where one can look at the river a great place near the river and have a good dinner there.

Predicted that at 12:30 the clock at Perry's will run down 2 times and will be 6 more or less when we arrive.

We had a good time and a good time and then we packed up our things and got ready to leave.

We called at the place where I first called and there was a large crowd of people there. We got a good price for our goods.

12:30 P.M. Late and early.
Sunday, April 23, 1924

The sea was kind of milky and the waves were puffing out. The wind had it pegged down, and we were going to all meet at the bridge and have dinner. A few men were on the bridge with their boats. They were having a good time.

We got back to the boat and got ready for dinner. We had a wonderful time on the bridge and had dinner later. That bridge was a real treat.

Tuesday April 25 - 1939.

At six this morning Dr. C and I left the gyroscopic part of the deck and went out to a rowboat. I could not smell in the rowboat and skinned our way to the circle. We were collected on a small rock with the vegetation near.

I lifted up my head and examined the sea. The sky was a dark gray and the air was a mixture of moisture. We were collected through the fog and were met by the Captain's hands.

Even motion all day.

Crossed muddly water to Magdalena River and explored front of a sand mound for new areas.

Came to C. Have been playing games called digger -lize. (gave C a game) The idea is to fill in or pull out the Chinese marked game hucked off man.
Wed. April 26 - 1939
Got in about 9 a.m. at Caledonia Bay. Court time at 11 a.m. Sheets & 2 bags collected at W. P. Rodol; N.W. & and range rest with tide foe. Hunch & still after lunch.
Got back to land at 2 p.m. left out to hedge, quite mad, often delay,
decided a little ahead of us. W. From (not sure)
Will wind channel till this lunch.
Got back at 4:16 half to stuff, after
lunch more before.
A large scale fish ran into side of
boat & stunned itself as no falling wheels.
